

Integrated Environmental Management and Energy Efficiency Policy

At **Cencosud Shopping S.A.**, Tax ID: **76.433.310-1**, and **Administradora de Centros Comerciales Cencosud SpA**, Tax ID: **78.408.990-8** (hereinafter jointly referred to as “Cenco Malls”), we work to improve the quality of life of our stakeholders by delivering a differentiated, sustainable experience, with high standards of quality in the commercial mix of our tenants and the services offered at each of our shopping centers. Our business vision is rooted in **integrating sustainability as a core element of our strategy**, one that we have established and continuously strive to improve.

This **Integrated Environmental and Energy Efficiency Policy** is aligned with our sustainability strategy and establishes the framework for reviewing, measuring, and managing environmental and energy-related aspects and impacts, as well as for preventing pollution in our operations. Based on this, Cenco Malls has established the following lines of action:

- **Comply with legal requirements and other** applicable environmental and energy-related obligations.
- Set **environmental and energy objectives and targets** based on management systems, ensuring the **availability of the necessary information and resources** to achieve them.
- **Reduce greenhouse gas emissions** from our operations by **identifying, assessing, and managing environmental impacts**, aiming to protect biodiversity and ecosystems and mitigate potential climate change.
- **Promote energy efficiency** and the **use of renewable energy sources** in processes and facilities, evaluating services, products, and design activities to improve the company's energy performance.
- **Adopt sustainable waste and water resource management**, prioritizing circular economy practices.
- **Foster communication** spaces with stakeholders focused on sustainability, particularly environmental matters.
- Enhance the offering of experiences and services by promoting **sustainable attributes across our suppliers' value chains**.
- **Educate employees** on environmental management and energy efficiency to improve the delivery of **experiences and services with sustainable attributes for our customers**.

Sebastián Bellocchio Fioretti
